Initial site build review notes

Website topic: coffee drinks

- I really enjoy the way you have overlaid the text on “coffee 101” “ recipes” and “sources” you might go back into Photoshop and use the burn tool over the images so that the white text is higher contrast and easier to read.
- The “follow us” might be slightly smaller or in sentence case instead of all caps
- Overall needs some work with the alignment and the placement of the text and images..some of the spacing is weird
- You might also consider making it more responsive to different window dimensions, and make sure the text flows accordingly when the browser is expanded or minimized.
